Easy, efficient, productive:
Your intuitive workflow platform

The e-STUDIO4540c series colour systems enrich your workgroups with intuitive productivitiy – and a unified platform for a modern, digital document workflow.

### Your print workflow is future-ready – as of today

The e-STUDIO4540c series colour systems are so easy to manage and so intuitive to handle that they unfold their full productivity potential in no time. They smoothly and safely integrate into existing network environments. Thanks to their open architecture they are ready to connect to future applications, from Mobile Printing to Cloud Computing, through embedded open platform technology.
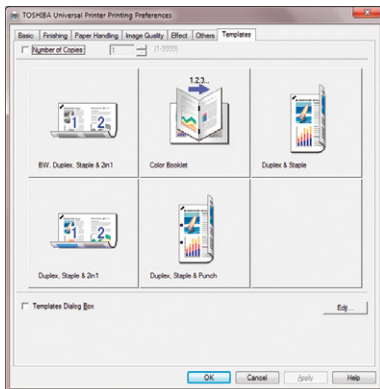

One platform – for everything regarding documents

The unique Toshiba e-BRIDGE controller and software platform is the key to outstanding system performance – which can even be increased to match future application demands. Company-wide network print, scan, copy and fax functionality is available at all times. Regardless of the number of installed systems – administration and controlling of status and costs remains simple and transparent.
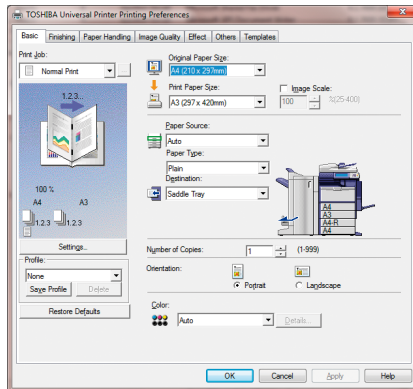

Increasing productivity has never been so easy

The new, universal printer driver simplifies the handling for every user. Several e-STUDIO systems can easily be accessed and controlled via a single driver. The large, adjustable LCD touch panel with its ergonomic user interface allows full and instant access to the impressive added values – e.g. the My Menu function with user-specific one-touch templates.

Easy-to-use printer driver with one-touch templates

High performance for efficient productivity

Tandem printing speeds up the output of high volume print jobs, as they can be allotted to different devices if necessary. Thanks to the flexible configuration of paper feed and paper options, even complex print jobs are mastered easily and paper weights from 64 to 256 gsm are handled without any trouble.

Every one of the five models of the e-STUDIO4540c series comes with a large choice of paper cassettes, trays and finishing options.

Whether hole punching, stapling or booklet printing with saddle-stitch and fold – the optional finishing possibilities leave plenty of room for your creativity.

Key benefits:

- Five e-STUDIO colour systems matching every workgroup size.
- Printing up to 45 pages per minute, scanning up to 57 pages per minute.
- Toshiba e-BRIDGE technology for fast processing and easy software extension.
- Time-saving and intuitive handling thanks to the large LCD touch panel and a new, ergonomic printer driver.

e-BRIDGE software – for higher productivity:

- **e-BRIDGE Re-Rite** – the integrated text recognition creates and stores searchable and editable documents in many languages and file formats.

- **e-BRIDGE Document Library** – the central information database for the document-based knowledge of your organisation.

- **TopAccess** – a browser-based management tool for all e-BRIDGE systems.

- **e-BRIDGE Fleet Management System** – centralised administration and controlling of all Toshiba devices in your company.

Driven by

Enhanced security and responsibility

Workflow security on all levels

Being connected to the world is crucial to efficient document handling, but at the same time makes high demands on security issues. Therefore, an integrated firewall combined with the sophisticated user authentication prevents unauthorised access to your e-STUDIO systems and your valuable information.

The entire print data and document handling has been designed to respect security and integrity: from role based access to hard drive encryption. Every colour system of the e-STUDIO4540c series offers you SSL-Encryption, Secure PDF, individual rights assignment and user-specific access via personal ID card, thus ensuring secure workflows.

Future-proof sustainability

Caring for the environment and its resources is part of Toshiba's tradition – starting with the choice of materials all the way to recycling issues. The colour systems of the e-STUDIO4540c series comply with international environmental protection standards, operate pleasantly silent as well as energy-efficent.
